# COALA MAGFORCE PET 350

### MATERIAL DESCRIPTION

Coala MagForce PET 350 is a new generation printable magnetic film, that is thinner and lighter, but with a stronger magnetic force than traditional PET print magnets. Coala MagForce PET 350 has a better roll flatness and allows smooth printer feeding and easier cutting. Besides, due to the lower weight, it offers many operational cost-saving advantages compared to traditional magnets.

Coala MagForce PET 350µ is an alternative magnetic film for Coala Magnetic Printable PET 500µ. It can be printed with (eco)Solvent, Latex, UV cure inks and Screenprint.

## PRINTER & INK COMPATIBILITY

# **CHARACTERISTICS**

• Surface: matt

Print side: white PET layerBase material: flexible magnet

Thickness: 350µmWeight: 895g/m2

• Magnetic force: 20-24 g/cm<sup>2</sup>

• Guaranteed magnetic force ≥ 20g/cm<sup>2</sup>

# **APPLICATIONS**

- Retail advertising
- Trade show graphics
- Interior decoration
- · Wall graphics

#### **STORAGE & SHELF LIFE**

- The shelf life of this media is 1 year uner normal conditions  $(10^{\circ}\text{C} 35^{\circ}\text{C} \text{ at a relative humidity } 30\% 75\%)$ . Higher humidity and/or temperature can affect the product performance.
- · Always store the media in a dark place in its original packaging.

# MAGNETIC FORCE THICKNESS WEIGHT

# **FEATURES**

- · Thin and light-weight magnetic film
- · Adheres to steel-based surface
- Very good flatness
- Allows smooth printer feeding and easy cutting
- Easy to install and (re-)move
- · Reduces the life cycle cost for signage
- · Also available in other thicknesses
- VOC-Free, A+ certified

The following technical details are issued to the best of our knowledge, however, without any responsibility for results due to several different kinds of material and application processes. Therefore, we highly recommend that before every usage a test should be conducted on the original material. Antalis cannot be responsible for any damage to the printer caused by printing our media.
