SHELF LIFE STORAGE AND CONDITIONS

• 1 year under normal conditions (+15° to +35°C at a relative humidity 30%-75%). Higher humidity and/or temperature can affect the product performance. It is recommended to let the material adapt to the printing room conditions 24 hours before printing. Always store the media in a dark place in its original packaging.

The following technical details are issued to the best of our knowledge, however, without any responsibility for results due to several different kinds of material and application processes. Therefore, we highly recommend that before every usage a test should be conducted on the original material. Antalis cannot be responsible for any damage to the printer caused by printing our media.
