

CYCLUS PREPRINT

The Original recycled paper

Cyclus Preprint is a recycled uncoated, natural shade paper with its very own character. The paper accentuates the creative message, where touch and feel combine with - and support - the visual image. Cyclus is made from 100% recycled pulp, which reduces water consumption and also uses considerably less energy compared to virgin fibre paper. By choosing Cyclus Preprint you can meet your environmental commitments without compromising the visual quality of your work.
