

HP Non-woven Durable Suede Wall Paper

The HP large format printing system—the complete solution

HP large format printers, Original HP inks and printheads, and Original HP printing materials are designed to work together as a system to provide uncompromising image quality, reliability, and consistency—with every print.

What is EN233?

EN233 is a European Wallcovering Standard that specifies requirements for cleanability and light fastness, and gives a designated marking system. The standardization is intended to ensure consistency throughout the industry.

Produce innovative, eye-catching PVC-free¹ wall murals

Be productive—non-woven durable wall paper prints are easy to install and remove

Help your customers define interiors with durable, colourful, creative wall decorations that last—with scrub- and scratch-resistant performance. Easy to install with standard wall glue only, this wallpaper produces seamless results, and it is both easy to apply and dry strippable. Thanks to the special backing that doesn't expand when wet, soaking the paper prior to hanging is no longer required; the paste can be applied directly to the wall. This feature provides long-lasting, durable adherence to the substrate.

Set your business apart with environmental certifications

A PVC-free¹ alternative that is easier to dispose of than most PVC-based substrates. The non-woven base paper is flame resistant,² and REACH compliant,³—a regulation of the European Union adopted to improve the protection of human health and the environment from risks that can be posed by chemicals. HP Non-woven Durable Suede Wall Paper carries the CE and UKCA certifications.⁴

Boldly define interior spaces—see the ColorPRO difference

See high-impact graphics with an extended range of colours. Engineered with ColorPRO Technology to deliver colour excellence, this digital wall decoration solution from HP delivers professional quality and striking results.

Target customers	Applications	Benefits	
Print service providers	Wall murals	Compliance with international wallcovering industry standards	Environmental and health certifications
Interior designers	Wall cut-outs	EN233 extra washability rating (wave 3)	PVC-free ¹ alternative, easier to dispose of than most PVC-based substrates
	Creative design applications	Works with common primers, pastes, finishing, and installation methods	Class A, B1, M1, and EN 13501-1 fire certifications ²
Carries the CE and UKCA certification ⁴
